Re: CenturyTel Wireless, Inc.
Quarterly Report on TTY Digital Deployment
CC Docket No. 94-102

Dear Ms. Salas:

Pursuant to the Commission's request, CenturyTel Wireless, Inc., through its undersigned counsel, hereby submits its second quarterly report summarizing its efforts toward implementing TTY access to 911 over its digital wireless systems. CenturyTel Wireless understands that the Commission's TTY 911 requirements do not currently apply to analog wireless systems. CenturyTel Wireless submits this report on behalf of the wireless carriers listed on Exhibit A.

CenturyTel Wireless utilizes Nortel Networks ("Nortel") wireless switches. CenturyTel Wireless is relying on the plans of its handset vendors and Nortel in order to comply with the Commission's TTY 911 requirements.

1. Network infrastructure software development.

Nortel reports that its software development is complete, and that it has also finished its product test.

2. Handset development and testing plans.

CenturyTel Wireless is working with its handset vendors to confirm the vendors' handset development and testing plans.

3. Beta testing and lab testing.

CenturyTel Wireless intends to conduct field testing upon receipt of the switch software upgrade from Nortel. With respect to handset testing, CenturyTel Wireless will conduct any necessary tests once handsets are available.

No. of Copies rec'd _____
List ABCDE _____

①

4. Release and general availability to carriers of network infrastructure software.

Nortel has stated to CenturyTel Wireless that it is committed to deploying the enabling software as part of the MTX10 software update for its wireless switches in accordance with the Commission's December 31, 2001, deadline. However, Nortel has also since informed CenturyTel Wireless that it expects to deliver the software on December 31, 2001 (on the date of the deadline).

5. Availability to carriers of full acceptance test units.

CenturyTel Wireless is working with its handset vendors to confirm the vendors' plans for making full acceptance test units available.

6. Efforts toward achieving digital wireless solution compatibility with enhanced TTY devices.

CenturyTel Wireless is working with its handset vendors to confirm the vendors' efforts toward achieving digital wireless solution compatibility with enhanced TTY devices.

7. Carrier coordination of testing with PSAPs.

CenturyTel Wireless will coordinate testing with PSAPs necessary network infrastructure is in place.

8. Carrier testing activities.

CenturyTel Wireless will schedule consumer testing after the necessary network infrastructure and handsets are available.

9. Retail availability of necessary consumer equipment.

CenturyTel Wireless is working with its handset vendors to confirm expected availability of necessary consumer equipment for TTY purposes.

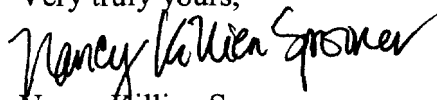

10. Geographic scope of network infrastructure deployment.

At this time, CenturyTel Wireless cannot fully predict the geographic scope of network infrastructure deployment for TTY compliance purposes, as the geographic scope of deployment will be dependent on the availability of the necessary software upgrades as well as acceptable handsets.

Ms. Magalie Roman Salas, Esq.
